High capacity rotisseries RBG 20

This range of high capacity rotisseries (20 or 30 chickens) has been developed in the aim of a simple and quick use:

- for the cooking: new spits easy to use, no more forks or inserts, you just have to directly skewer the chickens, one after the other. Each heating area is individually adjustable to offer you a complete autonomy according to the quantity of chickens to roast.
- for the maintenance: you can manually take off the back suspended panel (electric model), making easier the cleaning and any technical intervention.

RBG 20: Gas model fitted with 5 infrared ceramic burners with safety thermocouple, one on/off switch per motor, one mini /maxi regulation knob for each burner. Halogen light on top part (300W), safety glass doors, waterproof juice collector, pilot lights. Delivered in LPG with a set of NG injectors.

Power : 19 kw

Outside dimensions : 940 x 445 x 1250 mm
